

P&A SERVICES

Introducing Next-Generation Environmental Protection & Accountability—Only from Axis

Axis Energy Services is reinventing plug and abandonment, from the field to the cloud. It starts with fully self-contained P&A solutions designed for ease and efficiency. We bring a complete package of leading-edge equipment, purpose-built for today's P&A operations. Our experienced, highly trained crews focus on safety and environmental protection—downhole and at the surface. Every job is CORE® Certified, delivering the industry's highest level of transparency through our exclusive digital performance platform.

SERVICES

The Axis Advantage

- **One Team, One Goal** – Our comprehensive P&A solutions include preparation of all regulatory documents and operational oversight by a full-time supervisor on location at all times. This unified approach ensures everything we do is focused on achieving one goal: safe, efficient plugging operations for even your deepest and most challenging wells.
- **Unmatched Visibility & Virtual Field Inspection** – CORE provides real-time data on all critical operations, so you can be certain every well is closed precisely to specification. Access CORE from anywhere on your computer or mobile device, allowing you to redirect resources from in-person inspections to other priorities.

COMPLETE P&A PACKAGE

Standard P&A Package

- 500-Series Well Service Rig
- API Certified Base Beam
- API Certified 7-1/16" 5K Well Control Equipment

- Hydraulic Casing Jacks
- Handling Tools and Equipment for 4-1/2" - 9-5/8" casing
- Hydraulic Catwalk and Pipe Racks
- Power Swivels
- Work Strings
- Fishing Tool Services

- **Multi-Layered Approach to Minimizing Downtime –** Our state-of-the-art rig fleet and ancillary equipment deliver superior performance and reliable operations. We have a single-source solution available to minimize the number of vendors on site. We also prepare for the unexpected with critical spares close by.
- **Holding Ourselves to a Higher Safety Standard –** Our crews receive extensive health, safety and environmental training to maintain a broad range of certifications. Advanced automation reduces manual tasks, and we closely monitor conditions at the wellhead to anticipate potential issues.
- **Reducing Our Carbon Footprint & Yours –** Multi-purpose equipment enables us to cut carbon emissions by reducing transport loads and vehicles at the wellsite. Virtual Field Inspections can shrink your carbon footprint even further.
- **Salvage Recovered from the Well –** In our continuous effort to help our customers minimize costs, Axis will purchase and credit the P&A invoice for any and all salvage recovered from the well during the abandonment process.

AREAS OF OPERATION

Axis provides P&A services in the Ark-La-Tex, Bakken, Eagle Ford, Marcellus, Permian and SCOOP/STACK regions.
