

# Axis 290K Standalone

FULLY INTEGRATED WITH AXIS CORE®  
REAL-TIME DATA ACQUISITION

## Pushing Long-Reach Lateral Drill Outs

### FEATURES

- CORE® Enabled—Real-time data acquisition and analytics
- One-piece pick up design on multi-well pads
- 290K lb. pulling capacity (300K lb. max), 149K lb. snubbing capacity
- 10,000 ft-lb. torque capable rotary
- 3-winch system complete with 1 x 5,000 lb. "heavy winch," 2 x 2,500 lb. pipe handling winches
- 300K lbs. maximum load capacity slip bowls
- Dramatically reduces footprint on location
- Purpose-built for long-reach lateral drill outs

### PROPRIETARY TORQUE GUIDE SYSTEM

Removable torque guide system guides the jack and prevents wear and deflection on jack cylinders during drilling operations, lowering the buckle length.

Torque rail system allows for a full stroke to be made while rotating tubing/pipe. No torque is exerted onto the rods of the jack but displaced through the torque rail system.
