When choosing a fishing and rental company, it is important to pick a company whose field people have a deep and thorough understanding of workover and completion processes. In addition to our modern equipment and tool inventory, our fishing supervisors have years of localized experience working with all well characteristics, including HPHT, heavy crude, high pressure gas, conventional, non-conventional, high H₂S and high CO₂ wells. With experience in all major producing basins in the United States, we are capable of assisting with any downhole challenges.

Full-Service Casing Exit and Fishing Tool Operations

Axis offers a full range of fishing capabilities and reverse unit operations run by fishing supervisors with years of experience. Our managers know the work happens in the field and offer the highest level of around-the-clock service possible. We provide our operators with reliable equipment and the tools to do their jobs safely and efficiently. Axis can assemble a package to accompany any of our other comprehensive service lines and accommodate your needs at the well.

- Complete range of fishing equipment and rental tools to fish in 2 3/8" and up to 9 5/8" tubing or casing.
- All tools are made from high alloy, heat-treated steel and inspected after each job to ensure superior quality.
- Downhole motors are inspected pre- and post-job to ensure motors are performing at OEM specification.
- All handling tools are certified annually with Cat IV certification.
- Our 10K pumps include Rolligon systems that work together effectively with our downhole motors.
